Part 2: Translation and Syntax—45 points total (ca. 15 pts Transl. and ca. 30 pts Syntax Questions)
DIRECTIONS:
For the following *seen* sentences:
1) **TRANSLATE** each sentence, reflecting the correct grammatical constructions in English.
    a. Remember to **be as literal as you need to be** to show me the actual grammar/syntax of the Latin sentence.
    b. **Remember,** too, that these sentences may have slightly altered from the version we read before, so pay close attention to each word as you **translate**.

2) **ANSWER** the **GRAMMAR QUESTIONS** that follow for the **UNDERLINED WORDS.**
    a. **"FULLY IDENTIFY"** = **FORM** and **FUNCTION**. Give a complete morphological identification (i.e., tell me everything you can about the *FORM* of the word), and a complete syntactical identification (i.e., tell me everything you can about the *FUNCTION* of the word).

1. Ūnus **homō** cīvitātem fortūnātam nōbīs **cūnctātiōne cōnservāvit**.

Fully Identify: **homō**

Fully Identify: **cūnctātiōne**

Fully Identify: **cōnservāvit**

Part 3: Unseen Translation (25 pts)
Do your best to **translate the passage accurately** while attempting to convey proper English idiom for the given Latin constructions. If you are unsure, at least put something down (I can give you partial credit if it's close!) because leaving it blank earns 0 points. Any unfamiliar vocab will be glossed. Just try to focus on what the Latin is telling you...don't let your own idea of what it *should* say lead you astray. **Be as precise as you can—especially on things like the tenses of verbs, reflexive pronouns, etc.**

Grammar/Syntax Questions:

"**Fully identify"** = give a complete morphological and syntactical identification
               (Think: **FORM** and **FUNCTION**)
